**BNSP**
- **Feb 2024 - Feb 2027**  
Computer competency certification  
Internship UI/UX Designer

OUR PROJECT

# UI/UX DESIGNER

## Mobile Banking Apps

# JAWARA APPS

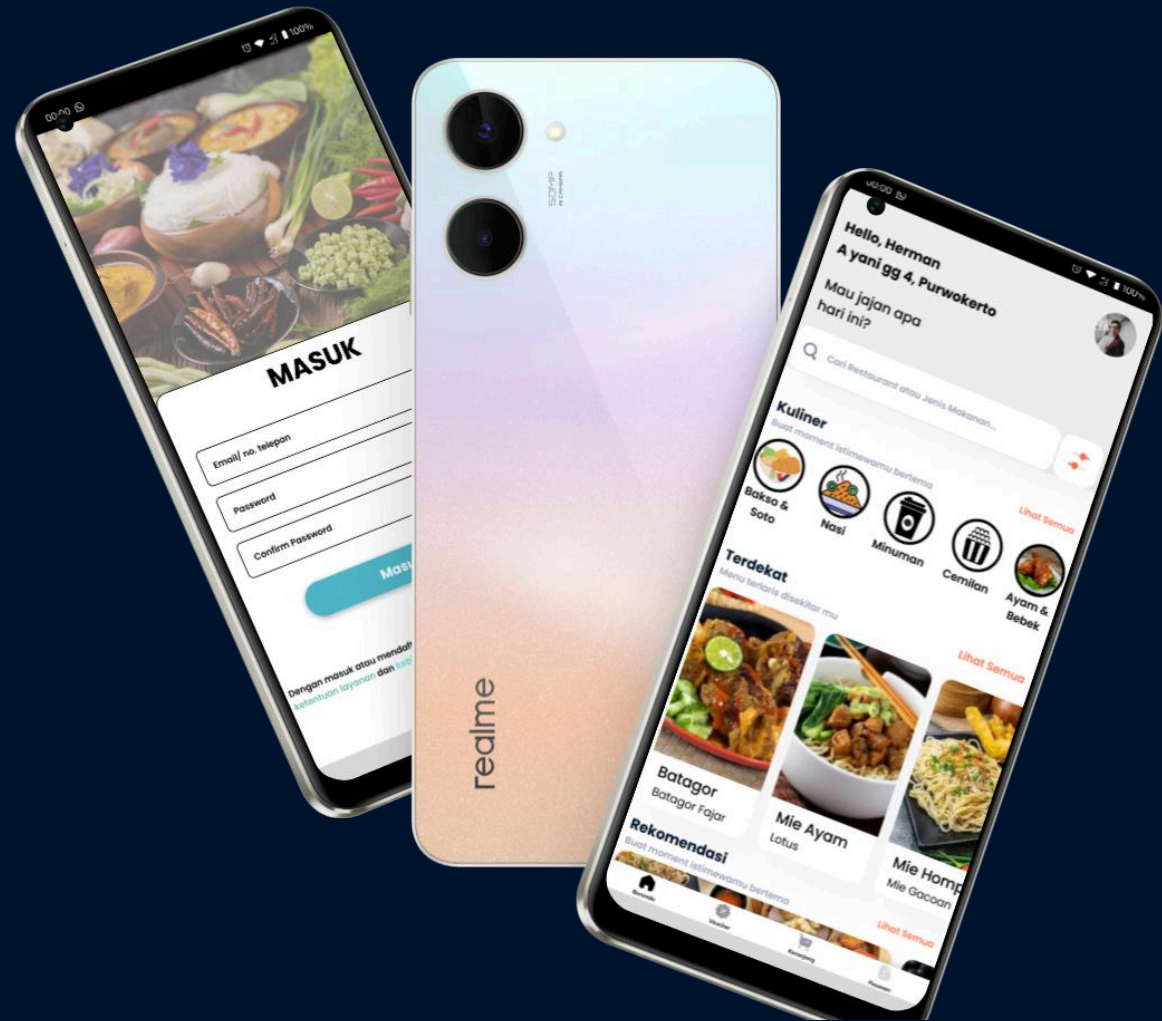

Bank Jawa is a modern digital banking platform designed to provide easy banking services, safe, and fast. With a main focus on financial inclusion, Bank Jawa is here to serve various levels of society with intuitive interface design and optimal user experience (UX).

## Food Delivery Order

# JAJANIN APPS

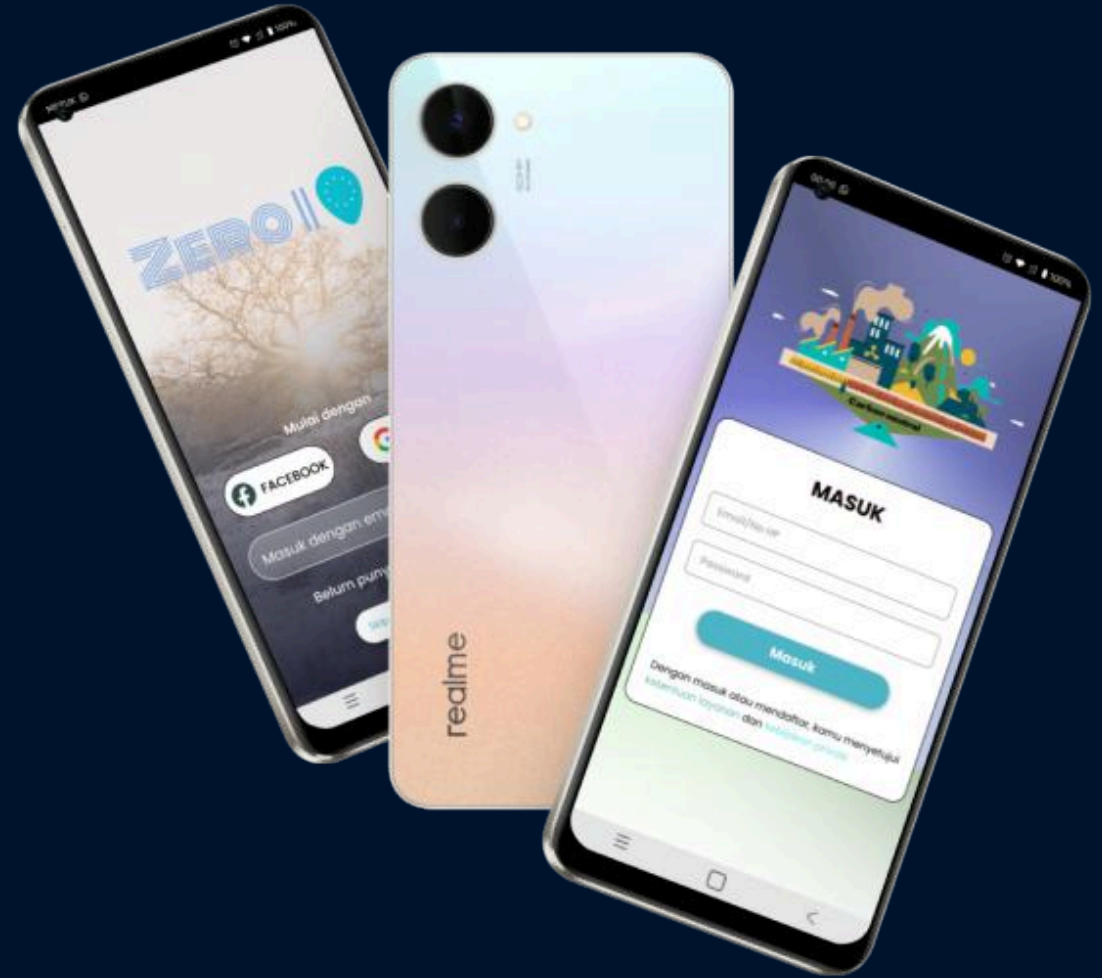

The Jajanin app is designed with a friendly and efficient user interface, prioritizing speed in finding and ordering food; this is reflected in the homepage that presents personalized recommendations and easily accessible categories, restaurant pages that display menus with high-quality images and clear customization options, and a transparent and streamlined basket and payment process for a seamless ordering experience from start to finish.

## Emissions track record apps

# ZERO APPS

The Zero app is designed with an intuitive UI design that makes it easy for users to record and understand their personal carbon emissions through clear data visualizations. The app's community page is designed to resemble a social media platform, allowing users to interact, share sustainability tips, and motivate each other through features such as posts, comments, and leaderboards. Meanwhile, the donation feature provides a transparent interface to select and support verified environmental projects, complete with project details, donation progress, and easy payment flow.

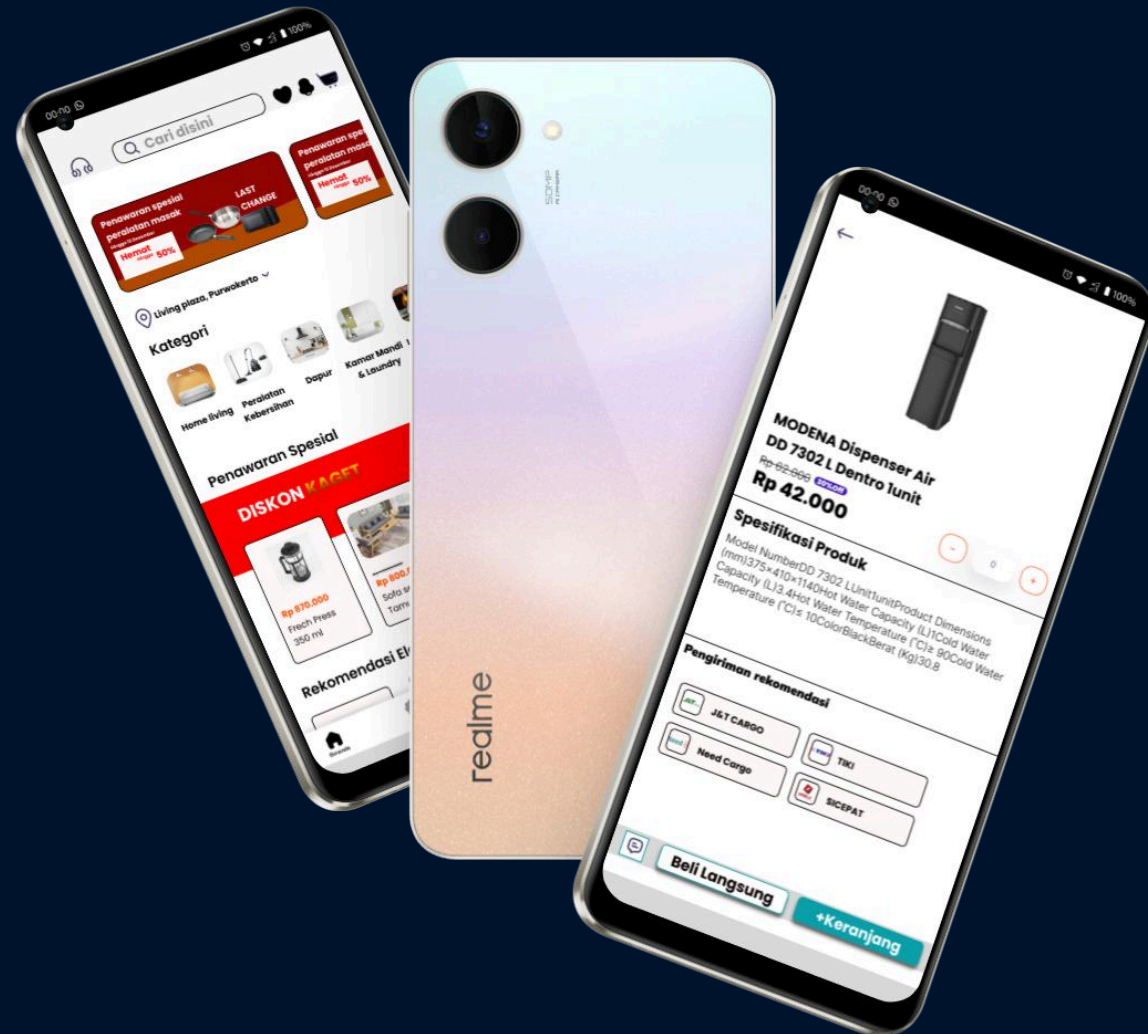

## Household needs application

# Need APPS

The UI design of the home supply app focuses on high-quality product visualization and inspiring navigation through a homepage featuring trends and collections, an easy-to-filter catalog, and product detail pages complete with visualization options and reviews, to help users find and purchase their dream decor or furniture.

## Redesign Mobile Banking Apps

# JAWARA APPS

Bank Jawaara is a modern digital banking platform designed to provide easy banking services, safe, and fast. With a main focus on financial inclusion, Bank Jawaara is here to serve various levels of society with intuitive interface design and optimal user experience (UX).

# Thank You
